

Fifty One Fifty One celebrates 7 Years

Fifty One Fine Art Photography is proud to celebrate its seventh anniversary. Since our opening in June 2000 we have successfully organised over 30 exhibitions. Each showing one or several of the world's most outstanding photographers. We also participated in some of the most respected art fairs in the world, such as Art Brussels, Paris Photo, Art Cologne and Photo London.

Over the years Fifty One Fine Art Photography went global. People from over 100 different countries have visited our website. Magazines from all over the world, like the Spanish Quo Magazine, the Mexican Pic-Nic magazine, the Japanese Newsweek, ... have published articles on many of our exhibitions. This is not only a confirmation of our work but also of the growing interest in the thrilling world of photography.

Our upcoming exhibition will be as exciting as ever. We will show several artists that stood by us these last years, but we will also very proudly introduce some work by artists who have only recently joined the gallery. Such as the renowned Belgian photographer and full member of Magnum Photos, Carl De Keyzer and the Austrian photographer Peter Granser. Peter Granser became famous almost overnight with his two books, Sun City (2003) and Alzheimer (2005).

These seven amazing and rewarding years have to be celebrated accordingly. That is why we would like to welcome you to join us for a drink at the opening on Saturday, the 16th of June.
